

# BoilerGard™ 1202

Non-Toxic Closed System

Corrosion and Scale Inhibitor Additive

---

## Description:

**BoilerGard™ 1202** is a concentrated, high performance, non-toxic corrosion and scale control additive for water and glycol/water fluids.

## Advantages:

**BoilerGard™ 1202** is designed to safely and effectively provide long term ferrous and non-ferrous metal corrosion protection. **BoilerGard™ 1202** is very effective at low dosage rates in controlling corrosion in holding tanks, piping and valves in all types of heating, cooling and storage systems. **BoilerGard™ 1202** greatly reduces the corrosion rate of water filled metal piping over long periods of time by forming a protective film on metal surfaces. **BoilerGard™ 1202** is also very effective at preventing calcium scale buildup on heat exchange surfaces. **BoilerGard™ 1202** contains non-toxic ingredients and can be blended with ethylene and propylene glycol solutions.

## Directions:

For best results, the system should be as clean as possible. Proper cleaning with **Hydro-Solv™ 9250** will remove oil, dirt, grease and corrosion by-products. A clean metal surface will allow **BoilerGard™ 1202** to provide a protective corrosion barrier.

**BoilerGard™ 1202** should be mixed with low hardness water, (less than 100ppm) at the rate of 1 gallon per 150 gallons of system fluid. The system fluid should be checked and tested annually. Replace fluid if water becomes contaminated or discolored.

**BoilerGard™ 1202** should not be used in systems with aluminum boilers.

## CAUTION:

Do not ingest. If this should occur, drink large volumes of water and seek medical attention. Keep container sealed when not in use to prevent contamination.

**KEEP OUT OF REACH OF CHILDREN.**

**Container Disposal:** Triple rinse container and discard according to local regulations.

**HMIS RATING:** Health-1; Flammability-0; Reactivity-0; Personal Protection-B.
